ABOUT ME

Final-semester student of Bachelor of Information Technology (Hons) in Business Computing at Universiti Poly-Tech Malaysia, currently completing internship until October 2025. Skilled in software development, database management, and project management, with exposure to quality assurance and business analysis through internship tasks. Self-disciplined, adaptable, and eager to apply problem-solving and communication skills in real-world environments.

EDUCATION

Universiti Poly-Tech Malaysia | 2023 – Present

Bachelor of Information Technology (Hons) in Business Computing | CGPA: 3.62

Developed strong knowledge in business computing, database systems, software development, and project management. Gained practical experience through coursework and projects such as the Food Sharing Apps (Final Year Project) and Library Management System, focusing on problem-solving and real-world application.

Kolej Universiti Poly-Tech MARA | 2020 – 2022

Diploma in Computer Science | CGPA: 3.62

Built a solid foundation in programming, algorithms, and system development, with hands-on exposure to projects including a Cooking Recipe Website and Storytelling Mobile Application, strengthening both technical and teamwork skills.

WORK EXPERIENCE

Integro Technologies | May 2025 – Present

Intern – Business & System Analyst

Analyzed requirements and contributed to developing system-based solutions. Assisted in quality assurance tasks, including testing and test case preparation. Provided user and system support while gaining exposure to business process analysis and workflow understanding.

Infranet Systems Sdn Bhd | July 2023 – October 2023

Intern – IT Support & Project Assistance

Assisted in installing and configuring IT systems while improving client communication and problem-solving skills. Gained exposure to quality assurance and business analysis through testing and documentation tasks, and supported project deliverables including tender preparation and timeline tracking.

PROJECTS

StocktakeEase Inventory System (Final Year Project) (Dec 2024 – Apr 2025)

Developed an inventory management system with automated stocktake features to improve efficiency and reduce manual errors, using PHP, HTML, CSS, Javascript and MySQL.

Library Management System (Nov 2023 – May 2024)

Designed a digital library system to manage book cataloging, borrowing, and user records, improving accessibility and operational workflows.

Food Sharing Apps (Final Year Project) (Dec 2021 – Mar 2022)

Built a mobile application to support community-based food sharing, with features for donation matching, user authentication, and real-time updates.

Storytelling for Kids Mobile Application (Dec 2021 – Mar 2022)

Created an interactive mobile app for children, integrating multimedia storytelling with user-friendly navigation for an engaging learning experience.

Cooking Recipe Website (Jul 2021 – Oct 2021)

Developed a responsive recipe-sharing website with categorized collections, search functionality, and basic user interface design using HTML, CSS, and JavaScript.
