SUMMARY

Fresh graduate in Information Technology (Business Computing) with hands-on experience in manual software testing and basic web development. Skilled in HTML, CSS, JavaScript, PHP, and SQL fundamentals, with exposure to test case preparation, bug reporting, and system validation. Detail-oriented and quick to adapt to new technologies and workflows.

EDUCATION

Bachelor of Information Technology (Hons) in Business Computing   Apr 2023 - Nov 2025
CGPA 3.70 | First Class Honours
Universiti Poly-Tech Malaysia (UPTM)
- Focused on core IT concepts, business systems, and software development.
- Gained exposure to system analysis, database fundamentals, and web technologies.
- Completed academic projects involving system development, documentation, and problem-solving.

Diploma in Computer Science   July 2020 - Dec 2022
CGPA : 3.62
Kolej Universiti Poly-Tech MARA (KUPTM)
- Completed studies in programming fundamentals, computer systems, and basic networking.
- Learned core concepts in computer systems, databases, and basic software development.
- Developed foundational skills in coding, system logic, and technical documentation through academic projects.

WORK EXPERIENCE

Intern – Business & System Analyst , Integro Technologies   May 2025 - Oct 2025
- Prepared and executed manual test cases based on system requirements and user stories.
- Performed functional testing to identify bugs and system defects across web-based applications.
- Documented test results, issues, and findings clearly for development and project teams.
- Assisted in validating business requirements and ensuring system functionality aligned with user needs.
- Collaborated with developers and supervisors to support system improvements and quality assurance processes.

Intern – IT Support & Project Assistance , Infranet Systems   July 2023 - Oct 2023
- Assisted in preparing and compiling tender documents according to project and client requirements.
- Provided IT support by troubleshooting hardware and software issues remotely and on-site.
- Performed basic hardware installation, setup, and configuration for client systems.
- Attended client meetings to support project discussions, requirement clarification, and follow-ups.
- Supported project-related administrative and technical tasks as assigned by supervisors.

PROJECTS

StocktakeEase Inventory System – Final Year Project (Dec 2024 – Apr 2025)

- Developed an inventory management system with automated stocktake features to improve efficiency and reduce manual errors.
- Utilized PHP, HTML, CSS, JavaScript, and MySQL for system development and database management.

Library Management System (Nov 2023 – May 2024)

- Designed a digital library system to manage book cataloging, borrowing, and user records, enhancing operational workflows.
- Implemented database-driven functionality and responsive web interface.

Food Sharing Mobile Application – Final Year Project (Dec 2021 – Mar 2022)

- Built a mobile app to support community-based food sharing with features for donation matching, user authentication, and real-time updates.
- Developed using front-end and back-end integration techniques.

Storytelling for Kids Mobile Application (Dec 2021 – Mar 2022)

- Created an interactive app for children integrating multimedia storytelling with user-friendly navigation for an engaging learning experience.
- Applied basic mobile UI/UX design principles and programming.

ADDITIONAL INFORMATION

- **Programming / Web Development:** HTML, CSS, JavaScript, PHP, React, Node.js, MySQL, MongoDB
- **Software / Tools:** Visual Studio Code, Power BI, Git, Jira, Microsoft Word
- **Languages:** English, Malay
- **Certifications:** CompTIA Data+
- **Extracurricular Activity :** Assistant Director for the Senate Awards event at Universiti Poly-Tech Malaysia (UPTM), ensuring smooth event flow. Coordinated logistics and managed event operations to maintain a seamless experience.
